## Table of contents

### Preface

### I. Introduction

- 1.1 Inventory of the Solar System
  - 1. *Giant Planets*
  - 2. *Terrestrial Planets and Other ‘Debris’*
  - 3. *Satellite and Ring Systems*
  - 4. *Heliosphere*
- 1.2 Planetary Properties
  - 1. *Orbit*
  - 2. *Mass*
  - 3. *Size*
  - 4. *Rotation*
  - 5. *Shape*
  - 6. *Temperature*
  - 7. *Magnetic Field*
  - 8. *Surface Composition*
  - 9. *Surface Structure*
  - 10. *Atmospheric Structure and Composition*
  - 11. *Planetary Interiors*
- 1.3 Formation of the Solar System
  - Further Reading
  - Problems

### II. Dynamics

- 2.1 The 2-Body Problem
  - 1. *Kepler’s Laws of Planetary Motion*
  - 2. *Newton’s Laws of Motion and the Universal Law of Gravitation*
  - 3. *Elliptical Motion, Orbital Elements, the Orbit in Space*
  - 4. *Elliptical, Parabolic and Hyperbolic Orbits*
  - 5. *Gravitational Potential*
- 2.2 The 3-Body Problem
  - 1. *Jacobi’s Constant and Lagrangian Points*
  - 2. *Horseshoe and Tadpole Orbits*
  - 3. *Hill Sphere*
- 2.3 ‘Planetary’ Perturbations and Resonances
  - 1. *Perturbed Keplerian Motion*
  - 2. *Resonances*
  - 3. *The Resonance Overlap Criterion and Jacobi-Hill Stability*
- 2.4 Long-Term Stability of Planetary Orbits
  - 1. *Secular Perturbation Theory*
  - 2. *Chaos and Planetary Motions*
- 2.5 Orbits About an Oblate Planet

1. *Gravitational Potential of an Axisymmetric Planet*
2. *Precession of Particle Orbits*

## 2.6 Tides

1. *The Tidal Force and Tidal Bulges*
2. *Tidal Torque*

## 2.7 Dissipative Forces and the Orbits of Small Bodies

1. *Radiation Force (micron-sized particles)*
2. *Poynting-Robertson Drag (centimeter-sized grains)*
3. *Yarkovski Effect (meter-kilometer sized objects)*
4. *Corpuscular Drag (sub-micron sized particles)*
5. *Gas Drag*

Further Reading

Problems

## III. Solar Heating and Energy Transport

### 3.1 Energy Balance and Temperatures

1. *Thermal (Blackbody) Radiation*
2. *Temperature*

### 3.2 Energy Transport

1. *Conduction*
2. *Radiation*
3. *Convection*

### 3.3 Radiative Equilibrium in an Atmosphere

1. *Thermal Profile*
2. *Atmosphere Heated from Below: Greenhouse Effect*

Further Reading

Problems

## IV. Planetary Atmospheres

### 4.1 Density and Scale Height

### 4.2 Thermal Structure

1. *Heat Sources and Transport of Energy*
2. *Observed Thermal Structure*

### 4.3 Atmospheric Composition

1. *Spectra*
2. *Line Profiles*
3. *Observations*

### 4.4 Clouds

1. *Wet Adiabatic Lapse Rate*
2. *Clouds on Earth*
3. *Clouds on Other Planets*

### 4.5 Meteorology

1. *Winds Forced by Solar Heating*
2. *Wind Equations*
3. *Horizontal Winds*
4. *Storm Systems*
5. *Observations*

### 4.6 Photochemistry

1. *Photodissociation and Recombination*
2. *Photoionization: Ionospheres*
3. *Electric Currents*

- 4. *Airglow and Aurora*
- 4.7 Molecular and Eddy Diffusion
  - 1. *Diffusion*
  - 2. *Eddy Diffusion Coefficient*
- 4.8 Atmospheric Escape
  - 1. *Thermal or Jeans Escape*
  - 2. *Nonthermal Escape*
  - 3. *Atmospheric Blowoff and Impact Erosion*
- 4.9 Evolution of Terrestrial Planet Atmospheres and Climate
  - 1. *Earth*
  - 2. *Mars*
  - 3. *Venus*

Further Reading  
Problems

## V. Planetary Surfaces

- 5.1 Mineralogy and Petrology
  - 1. *Minerals*
  - 2. *Rocks*
- 5.2 Crystallization of a Magma
- 5.3 Surface Morphology
  - 1. *Gravity and Rotation*
  - 2. *Tectonics*
  - 3. *Volcanism*
  - 4. *Atmospheric Effects on Landscape Morphology*
- 5.4 Impact Cratering
  - 1. *Crater Morphology*
  - 2. *Crater Formation*
  - 3. *Impact Modification by Atmospheres*
  - 4. *Spatial Density of Craters*
  - 5. *The Impact of Comet D/Shoemaker-Levy 9 with Jupiter*
  - 6. *Dangers of Impacts on Earth and the Extinction of the Dinosaurs*
- 5.5 Surface Geology of Individual Bodies
  - 1. *Moon*
  - 2. *Mercury*
  - 3. *Venus*
  - 4. *Mars*
  - 5. *The Satellites of Jupiter*
  - 6. *Satellites of Saturn*
  - 7. *Satellites of Uranus*
  - 8. *Satellites of Neptune*
  - 9. *Pluto and Charon*

Further Reading  
Problems

## VI. Planetary Interiors

- 6.1 Modeling the Interior Structure of a Planet
  - 1. *Hydrostatic Equilibrium*
  - 2. *Constituent Relations*
  - 3. *Equation of State*
  - 4. *Gravity Field*

- 5. *Internal Heat: Sources and Losses*
- 6.2 Seismic Tomography and the Earth's Interior
  - 1. *Seismology*
  - 2. *Interior Structure of the Earth*
- 6.3 Interior Structure of other Terrestrial Bodies and Moons
  - 1. *Moon*
  - 2. *Mercury*
  - 3. *Venus*
  - 4. *Mars*
  - 5. *Solid Bodies in the Outer Solar System*
- 6.4 Interior Structure of the Giant Planets
  - 1. *Modeling the Giant Planets*
  - 2. *Interior Structure of Jupiter and Saturn*
  - 3. *Interior Structure of Uranus and Neptune*
- Further Reading
- Problems

## **VII. Planetary Magnetospheres and the Interplanetary Medium**

- 7.1 The Interplanetary Medium
  - 1. *Solar Wind*
  - 2. *Maxwell's equations*
  - 3. *Magnetohydrodynamics (MHD)*
  - 4. *Interaction of the Solar Wind with Planets*
  - 5. *Shocks*
- 7.2 Magnetic Field Configuration: Mathematical Description
  - 1. *Overview*
  - 2. *Dipole Magnetic Field*
  - 3. *Multipole Expansion of the Magnetic Field*
- 7.3 Magnetospheric Plasma and Particle Motions
  - 1. *Particle Motions: Adiabatic Invariants*
  - 2. *Drift Motions in a Magnetosphere*
  - 3. *Electric Fields*
  - 4. *Particle Sources and Sinks*
  - 5. *Particle Diffusion*
- 7.4 Magnetospheres of the Individual Bodies
  - 1. *Earth*
  - 2. *Mercury*
  - 3. *Venus, Mars and the Moon*
  - 4. *Jupiter*
  - 5. *Saturn*
  - 6. *Uranus*
  - 7. *Neptune*
- 7.5 Radio Emissions
  - 1. *Low Frequency Radio Emissions*
  - 2. *Synchrotron Radiation*
  - 3. *Radio Observations*
- 7.6 Waves in Magnetospheres
  - 1. *General Wave Theory (Summary)*
  - 2. *MHD Waves*
  - 3. *Plasma Waves*

- 7.7 Generation of Magnetic Fields
  - 1. *Magnetic Dynamo Theory*
  - 2. *Variability in Magnetic Fields*
- Further Reading
- Problems

## VIII. Meteorites

- 8.1 Basic Classification and Fall Statistics
- 8.2 Source Regions
- 8.3 Fall Phenomena: Atmospheric Entry to Impact
- 8.4 Chemical and Isotopic Fractionation
  - 1. *Chemical Separation*
  - 2. *Isotopic Fractionation*
- 8.5 Radiometric Dating
  - 1. *Radioactive Decay*
  - 2. *Dating Rocks Containing Radioactive Isotopes*
  - 3. *Extinct-Nuclide Dating*
  - 4. *Interval Between Final Nucleosynthesis and Condensation*
  - 5. *Cosmic-ray Exposure Ages*
- 8.6 Physical Characteristics of Chondrites
- 8.7 Meteorite Clues to the Formation of the Solar System
  - 1. *Meteorites from Differentiated Bodies*
  - 2. *Primitive Meteorites*XS
- Further Reading
- Problems

## IX. Asteroids

- 9.1 Orbits
- 9.2 Size Distribution and Collisional Evolution
  - 1. *Size Distribution*
  - 2. *Collisions*
  - 3. *Rotation*
  - 4. *Interplanetary Dust*
- 9.3 Observing Techniques
  - 1. *Radiometry*
  - 2. *Photometric Light Curves*
  - 3. *Polarimetry*
  - 4. *Adaptive Optics*
  - 5. *Interferometry*
  - 6. *Radar Observations*
  - 7. *Determination of an Asteroid's Mass and Density*
- 9.4 Surface Composition
  - 1. *Asteroid Taxonomy*
  - 2. *Spatial Distribution of Taxonomic Classes*
- 9.5 Structure
  - 1. *Asteroid Surface Characteristics from Disk-averaged Ground-based Observations*
  - 2. *Detailed Images of Individual Asteroids and Mars's Moons*
  - 3. *Magnetic Fields?*
- 9.6 Origin and Evolution of the Asteroid Belt
- Further Reading

Problems

**X. Comets**

10.1 Nomenclature

10.2 Cometary Orbits and Comet Reservoirs

1. *Oort Cloud*
2. *Kuiper Belt*
3. *Nongravitational Forces*

10.3 Gaseous Coma

1. *Solar Heating*
2. *Outflow of Gas*
3. *Photodissociation and Chemical Evolution*
4. *Excitation and Emission*
5. *Composition*
6. *X-Ray Emissions*
7. *Comet Taxonomy*

10.4 Dust

1. *Morphology*
2. *Observed Properties*
3. *Escape of Dust*

10.5 Magnetosphere

1. *Morphology*
2. *Plasma Tail*

10.6 Nucleus

1. *Size, Shape and Albedo*
2. *Rotation*
3. *Splitting and Disruption*
4. *Surface Properties*
5. *Chemical Processing of Comets at large Heliocentric Distances*

10.7 Comet Formation and Constraints on Theories of Solar System Formation

1. *Where did Comets and Cometary Ices Form?*
2. *Dynamical Constraints*

10.8 Future

Further Reading  
Problems

**XI. Planetary Rings**

11.1 Tidal Forces and Roche's Limit

11.2 Flattening and Spreading of Rings

11.3 Observations of Planetary Rings

1. *Jupiter's Ring*
2. *Saturn's Rings*
3. *Uranus's Rings*
4. *Neptune's Rings*

11.4 Ring-Moon Interactions

1. *Resonances*
2. *Spiral Density Waves and Spiral Bending Waves*
3. *Shepherding*
4. *Longitudinal Confinement*

11.5 Physics of Dust Rings

1. *Radiation Forces*

- 2. *Interactions of Charged Grains with Planetary Magnetospheres*
- 3. *Spokes in Saturn's Rings*
- 11.6 Meteoroid Bombardment of Planetary Rings
  - 1. *Accretion of Interplanetary Debris*
  - 2. *Ballistic Transport*
  - 3. *Mass Supply to Rings from Satellite Ejecta*
- 11.7 Origins of Planetary Rings
- 11.8 Summary
  - Further Reading
  - Problems

## **XII. Planet Formation**

- 12.1 Observational Constraints
- 12.2 Nucleosynthesis: A Concise Summary
  - 1. *Primordial Nucleosynthesis*
  - 2. *Stellar Nucleosynthesis*
- 12.3 Star Formation: A Brief Overview
  - 1. *Molecular Cloud Cores*
  - 2. *Collapse of Molecular Cloud Cores and Star Formation*
  - 3. *Observations of Star Formation*
  - 4. *Circumstellar Disks*
- 12.4 Evolution of the Solar Nebula: The Protoplanetary Disk
  - 1. *Infall Stage*
  - 2. *Internal Dynamical Evolution of the Disk*
  - 3. *Chemistry in the Disk*
  - 4. *Clearing Stage*
- 12.5 Condensation and Growth of Solid Bodies
  - 1. *Timescales for Planetesimal Formation*
  - 2. *Formation of Solid Planetesimals*
  - 3. *Growth from Planetesimals to Planetary Embryos*
- 12.6 Formation of the Terrestrial Planets
  - 1. *Dynamics of the Final Stages of Planetesimal Accumulation*
  - 2. *Accretional Heating and Planetary Differentiation*
  - 3. *Accumulation (and Loss) of Atmospheric Volatiles*
- 12.7 Formation of the Giant Planets
  - 1. *Gas-instability Hypothesis (Giant Gaseous Protoplanets)*
  - 2. *Core-instability Hypothesis*
- 12.8 Planetary Migration
- 12.9 Small Bodies in Orbit About the Sun
  - 1. *Asteroids and Meteorites*
  - 2. *Comets*
- 12.10 Planetary Rotation
- 12.11 Origin of Planetary Satellites
- 12.12 Confronting Theory with Observations
  - 1. *Dynamical State of the Solar System*
  - 2. *Composition of Planetary Bodies*
  - 3. *Conclusions*
  - Further Reading
  - Problems

## **XIII Extrasolar Planets**

- 13.1 Physics and Sizes of Giant Planets, Brown Dwarfs, and Low-Mass Stars
- 13.2 Detecting Extrasolar Planets
  - 1. *Pulsar Timing*
  - 2. *Radial Velocity Measurements*
  - 3. *Astrometry*
  - 4. *Photometric Detection of Transits*
  - 5. *Microlensing*
  - 6. *Imaging*
  - 7. *Other Techniques*
- 13.3 Observations of Extrasolar Planets
- 13.4 Models for the Formation of Planets Observed to Orbit Main Sequence Stars Other Than the Sun
- 13.5 Planets and Life
- 13.6 SETI
- 13.7 Conclusions
  - Further Reading
  - Problems
- Appendix A** Symbols Used
- Appendix B** Units, Constants, Conversions
- Appendix C** Periodic Table of Elements
- References**
- Index**

## Tables

- Table 1.1 Planetary Mean Orbits
- Table 1.2 Terrestrial Planets: Geophysical Data
- Table 1.3 Giant Planets: Physical Data
- Table 1.4 Planetary Satellites: Orbital Data
- Table 1.5 Planetary Satellites: Physical Properties
  
- Table 4.1 Basic Atmospheric Parameters for the Terrestrial Planets
- Table 4.2 Basic Atmospheric Parameters for the Giant Planets
- Table 4.3 Atmospheric Composition of Earth, Venus, Mars and Titan
- Table 4.4 Composition of Planets and Satellites with Tenuous Atmospheres
- Table 4.5 Atmospheric Composition of the Giant Planets
- Table 4.6 Parameters  $C_b$  and  $q$  (cgs units) in Equation (4.75) for Various Gases
- Table 4.7 Eddy Diffusion Coefficient near the Homopause
  
- Table 5.1 Mohs Scale of Hardness
- Table 5.2 Chemical Classes of Minerals
- Table 5.3 Impacts and Life
- Table 5.4 Constants for the System Jadeite + Quartz  $\rightarrow$  Albite
  
- Table 6.1 Densities and Central Properties of the Planets and the Moon
- Table 6.2 Gravitational Moments and the Moment of Inertia Ratio
- Table 6.3 Heat Flow Parameters
